Raiders Surprise Forest 22-14

Raider quarterback Joe Fraley tossed touchdown passes to Chris Johnson and Darrell Schrock and Jay Franklin scored on a 4 yard run as Appomattox put 19 points on the board in the first half and defeated Jefferson Forest 22-14 in a Seminole District contest Friday night.

A high snap to the Forest punter gave Appomattox a first and goal at the Cavalier four-yard line. Jay Franklin took the ball in giving the Raiders a 7-0 lead with just over two minutes having elapsed in the first period. On the next series Fraley passed to Johnson for a 30 yard score and the Raider lead was 13-0. Forest then used six plays to move the ball 73 yards and a TD and the quarter ended with the Raiders ahead 13-6.

Late in the second period Forest grabbed a 14-13 lead as Mark Lester scored from one yard out and David Spinner ran for a two point conversion, but the lead was brief as Fraley hit Darrell Schrock with a 33 yard pass to put the Raiders ahead for good.

Both teams had opportunities in the second half, but the only score came on a 26 yard field goal by Freddie Mitchell in the third period.

According to a reliable source, the Raider varsity has never lost a game to the Cavaliers.

In district play this season the Raiders are 3-4 and will be trying to get even when they entertain Liberty this Friday in their Homecoming Game. Let's have a standing room only crowd for this important game.

The potential problem of Aflatoxin in corn is real. Some has been identified in the southeastern part of Virginia.

There is a free testing program through the Virginia Department of Agriculture. If you feel the need to have your grain tested, it can be done at no charge.

A letter will hopefully be received this week spelling out how to take and mail samples.

The Commodity Futures Trading Commission is seeking comments from farmers who may have encountered problems with brokers' handling of their futures trading accounts.

Any farmer wishing to make comments may obtain address and other pertinent information from this office.

The Feeder Cattle Sale in Lynchburg on October 6 had 1,349 steers that averaged 492 pounds and brought $43.05. The 811 heifers weighed 446 pounds and averaged $34.05.

Hog numbers in the 14 hog states are up 3 percent from a year earlier. Farrowing intentions for December - February are up 11 percent.

Looks like farmers are going to be in for reduced prices of hogs. With these kinds of increases, if a sharp price drop is to be avoided, some drastic changes will have to happen in the swine industry, but with $2.00 corn, it will be difficult to turn around.

The following cattlemen have cattle consigned to next week's Lynchburg sale: Bonherth Farms, J. C. Caldwell, J. W. Conner, Jimmy Drinkard, John L. Harrison and Jimmy Rosser. They will be marketing 111 head.

VERA CHURCH OF GOD TO HAVE WEEKEND REVIVAL

A weekend revival will be held at the Vera Church of God Friday, Saturday and Sunday evenings beginning at 7:30 p.m. each night.

Bruce Philippi from Norfolk will be guest speaker.

Everyone is invited to attend.

Here's a date you'll want to remember, January 18-19; it's the 1978 Electro Ag at the State Fair Grounds. The last time this show came to Virginia was 1975; at which time there were 56 exhibitors.

Many growers this year became aware of the importance of irrigation for profitable crop production.

There are at least two things that need to be said about the subject now: 1. Develop irrigation water sources now to be ready for next year. SCS can provide the necessary technical assistance. 2. If you are going to purchase an irrigation system, you should start making plans now. Contact your irrigation dealer for equipment layouts and costs. Don't spend money on a system unless adequate water is available.

Safety doesn't just happen -- it's planned. If you're using a ladder for fall painting, cleaning rain gutters or installing storm windows, remember to place the ladder with the bottom one foot from the vertical wall for every four feet of ladder height.

In the field, make it a positive rule when picking corn -- Disconnect the power before unplugging corn pickers. Keep hands and feet away from the snapping rolls.

Did you know that the best tractive efficiency for tractors occurs at 10 percent slip on firm soil, 13 percent slip on tilted soil and 15 percent slip on soft or sandy soil. Too much or too little slip reduces drawbar power.Add weight until slip is just slightly greater than required for maximum power. This prevents overweighting and conserves fuel.
